PROFESSIONAL SUMMARY

B.Tech graduate with a strong foundation in cybersecurity, computer networks, Linux administration, network traffic analysis, SSH security, vulnerability scanning, packet analysis, log analysis, and security monitoring. Hands-on experience developing Python-based cybersecurity tools for port scanning, packet sniffing, and SOC log analysis with real-time SSH brute-force detection. Comfortable working in Linux environments and using Python, Scapy, sockets, SSH, and system logs for security analysis. Seeking an entry-level cybersecurity opportunity in SOC operations, security analysis, blue team, incident response, or related security roles.

TECHNICAL SKILLS

Cybersecurity	Vulnerability Assessment, Network Security, Threat Analysis, Log Analysis, Security Monitoring, Brute-Force Detection, System Reconnaissance, Incident Investigation
Networking	TCP/IP, TCP, UDP, ICMP, DNS, HTTP/HTTPS, SSH, IP Addressing, Ports, Network Traffic Analysis, Network Protocols
Programming	Python, Bash, Python Socket Programming, Basic Automation
Security Tools	Scapy, Linux CLI, journalctl, SSH/sshd, Git, GitHub
Operating Systems	Linux, Arch Linux, Windows
Concepts	Port Scanning, Packet Sniffing, Service Enumeration, Log Monitoring, Authentication Analysis, Data Exfiltration Concepts, Network Segmentation

PROJECTS

SOC Log Analyzer Python — Arch Linux — SSH — journalctl

- Developed a Python-based SOC log analyzer to detect suspicious SSH authentication activity and potential brute-force login attempts.
- Collected SSH authentication logs from Linux using `journalctl` and processed failed login activity for analysis.
- Extracted usernames and source IP addresses and counted failed authentication attempts to identify suspicious authentication patterns.
- Implemented real-time monitoring functionality to detect and alert on suspicious SSH login attempts.

🐙 GitHub

Packet Sniffer Python — Scapy — TCP — UDP — ICMP

- Developed a Python packet-sniffing tool using Scapy to capture and analyze live network traffic on a Linux system.
- Extracted source and destination IP addresses, protocol information, and TCP/UDP port numbers from captured packets.
- Implemented real-time packet monitoring for TCP, UDP, and ICMP traffic to understand network communication patterns.
- Practiced network traffic analysis and packet-level investigation using Python and Scapy.

🐙 GitHub

Vulnerability Scanner Python — Socket Programming — Network Security

- Developed a Python-based vulnerability scanning tool to identify open ports and commonly exposed network services on a target system.
- Implemented TCP socket connections to scan ports 1–1024 and determine whether individual ports were accessible.
- Mapped common ports to services such as SSH, HTTP, and HTTPS to identify potential exposed entry points.
- Applied fundamental concepts of TCP connections, port scanning, service identification, and system reconnaissance.

🐙 GitHub

CYBERSECURITY PRACTICAL EXPERIENCE

- Investigated suspicious SSH access and authentication activity in Linux environments.
- Studied DNS tunneling and the use of DNS as a potential channel for covert data exfiltration.
- Analyzed HTTP/HTTPS communication and studied methods for identifying suspicious network traffic.
- Practiced phishing campaign analysis and identified common indicators associated with phishing attempts.
- Studied malware propagation, network segmentation, system hardening, patching, and attack-surface reduction.
- Performed practical cybersecurity simulations involving network traffic, authentication logs, reconnaissance, and security monitoring.

EDUCATION

Bachelor of Technology (B.Tech)

KIET Group Of Institutions

Graduation: 2025

Cybersecurity

CERTIFICATIONS

- Cybersecurity Associate Program — AimNxt Technologies
- Certified Cybersecurity Foundations (CORE) — Hackviser
- Networking Virtual Internship — Zscaler-supported program through AICTE–EduSkills

CORE STRENGTHS

Analytical Thinking | Problem Solving | Cybersecurity Analysis | Linux Troubleshooting | Network Analysis | Fast Learning | Technical Investigation
